

THE JIM LAWRENCE RANGE OF SHADES

**Candle Shade
(with candle clip)**

A classic shape for use with wall and pendant lights. Our candle shades have an internal clip to sit onto a candle bulb. They work with both traditional and low energy candle bulbs. We recommend that they are used with no more than a 40w traditional bulb, as hotter bulbs may scorch the shade.

Tapered Candle Shades

A smaller version of the candle shade, which again clips onto the top of any candle bulb. They look particularly striking when grouped together on a chandelier. We recommend that they are used with no more than a 25w traditional bulb to avoid scorching.

Empire Shades

A traditional and ever popular shape that works with all table and standard lamps. The 25cm, 30cm and 36cm diameter shades have a reversible shade ring so that they can also be used very effectively as pendant shades.

Cylinder Shades

A more contemporary shape, widely used for lighting solutions from table and standard lamps to feature pendants. Notwithstanding the contemporary shape they can make the perfect finishing touch for a vintage lamp. Our cylinder shades are available with matching diffusers.

Diffusers

Increasingly popular with ceiling fittings, diffusers soften the glare and hide the bulb. Our silk, linen and suede cylinder shades are available with matching diffusers, that slot into the bottom of the shade and cover the bulb whilst allowing light to filter out around the edges. We also make translucent diffusers that completely cover the bottom of the shade but allow light to filter through.

Tapered Shades

A very classic shape that works well on any table or standard lamp. The 20cm, 30cm & 40cm shades have a reversible shade ring that allows them to be used as pendant shades.

Square Shades

Bold and defined, these shades come in four sizes and look wonderful on any table or standard lamp with a geometric base. The 15cm, 24cm and 40cm sizes also create a striking 'modern retro' feel when used as pendant shades.

Rectangular Shades

A classic shape and consistently popular, especially on table lamps with a geometric base. These shades are also a practical solution where space is limited, as they are less deep than other shapes.

Oval Shades

A classic shape which enables a lamp to be positioned in a narrower space. The 21cm shade can also be used to great effect as a candle shade on a single wall light.

Lined Empire Shades

A more sophisticated Empire shade which is lined in white silk, giving any lamp a traditional 'country house' feel.

**Penrose Half Shade
(with candle clip)**

A smart shade in a classic shape for use with wall lights. The Penrose half shade clips onto the top of a candle bulb, allowing the shade to sit closely to the wall.

**Hanbury Half Shade
(with shade ring)**

The smooth curve of the Hanbury shade creates a more contemporary look. It can be used with any wall light that has a standard bayonet (B22) fitting with a shade ring holder.

**Carlyle Half Shade
(with shade ring)**

An eye-catching piece, this rectangular half-shade creates a sharp, clean silhouette. The Carlyle shade can be used with any wall light that has a standard bayonet (B22) fitting with a shade ring holder.

Bespoke Shades

If you would like a shade made specifically for you in any of the fabrics from our range, or if you require a different size, shape or fabric, then please do not hesitate to ring and discuss your requirements.
