

A Guide to Stunning Handmade Curtains & Blinds

1. Choose Your Heading (please put a tick by your choice)

Pencil Pleat

Just the right touch of classic simplicity.

Cottage Pleat

Perfect for creating a country feel.

Pinch Pleat

Smart and elegantly proportioned.

Tailored Pleat

An inverted pleat, offering understated simplicity.

Roman Blind - Velcro

A classic window treatment – ideal for kitchen and bathrooms.

Roman Blind - Pole

Specially designed to work with our range of handcrafted curtains poles.

2. Cleat & Pull finish (Blinds only)

Beeswax

Polished Lacquer

Matt Black

Clay

Old Ivory

Mercury

3. Choose Your Fabric (please write your fabric choice below)

View our full range of fabrics on our website. Each fabric is individually priced and can also be bought by the metre. Free fabric swatches are available to order from our website, or call us on 01473 826685 and we will pop them in the post for you.

Please note, because of the delicate nature of our raw silk fabrics, which are prone to deterioration when exposed to sunlight and handling, we don't generally recommend them for this use.

Should you decide to proceed, completing and returning this template indicates you understand those characteristics and accept the lifetime of the product will be limited.

4. Unlined, Lined or Interlined? (please put a tick by your choice)

Unlined

Creates an airy effect; ideal for voiles or soft linens.

Lined

Choose from 3 neutral colourways. A blackout option is also available.

White

Ivory

Cream

Blackout

Interlined

Our recommended choice for stunning curtains – interlining makes any fabric look its best.

How To Measure For Curtains & Blinds

How To Measure For Curtains

We recommend that you put up your pole before taking your measurements.

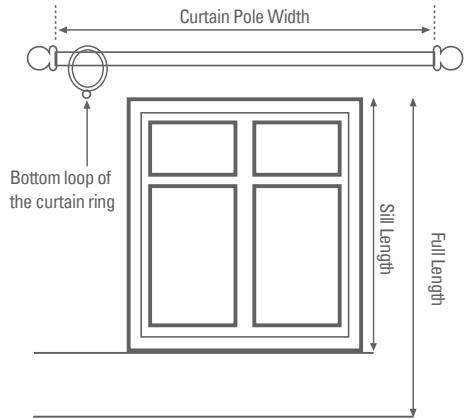

Width (cm):

Measure the pole not the window itself. Measure the width between the decorative finials.

Length (cm):

Please measure from the bottom loop of the curtain ring to the required length. We will add 3cm above the loop to your measurement.

For sill length measure to your desired length below the sill.
For full length measure to the floor or longer if desired.

How To Measure For Blinds

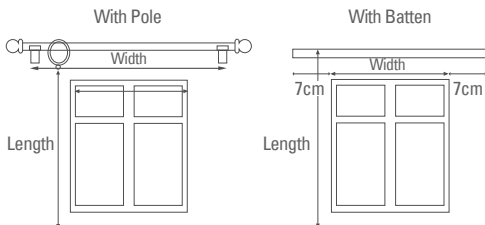

Outside a window recess:

Length (cm):

When using a pole, measure from the bottom loop of the curtain ring to the required length. When using a batten, measure from the top edge of the batten to the required length.

Width (Maximum width 150cm):

When using a pole please measure from the outside edge of each bracket once they have been fixed in place. When using a batten add approximately 14cm to the width of your window to allow sufficient overlap.

NB: Please let us know if you need your blind strung to the right or to the left.

Inside a window recess:

We recommend that a batten is used for blinds hung inside a window recess. The blind will be supplied with a self-adhesive Velcro heading and screw eyes (and the batten).

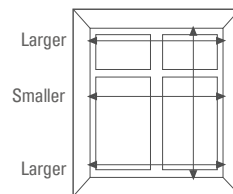

Length (cm):

Measure the length from the top to the bottom of the recess.

Width (Maximum width 150cm):

Measure the width at the top of the window recess, in the middle and at the bottom. Record the smallest measurement of the three to ensure the blind does not snag when being lowered. See the example below.

Use the narrowest point as your width

I confirm that all measurements and details are correct
