4. Choose Your Fabric (please write your fabric choice below)

View our full range of fabrics on our website. Each fabric is
individually priced and can also be bought by the metre. Free fabric
swatches are available to order from our website, or call us on
01473 826685 and we will pop them in the post for you.

Please note, because of the delicate
nature of our raw silk fabrics, which are
prone to deterioration when exposed
to sunlight and handling, we don't
generally recommend them for this use.

Should you decide to proceed,
completing and returning this template
indicates you understand those
characteristics and accept the lifetime
of the product will be limited.

5. Unlined, Lined or Interlined? (please put a tick by your choice)

☒ **Unlined**
Creates an
airy effect;
ideal for
voiles or
soft linens.

☒ **Lined**
Choose from 3
neutral colourways.

White

Ivory

Cream

Cream
Blackout

☒ **Lined & Interlined**
Our recommended choice
for stunning curtains –
interlining makes any
fabric look its best.

Blackout

6. Measure

How To Measure For Curtains

We recommend that you put up your pole before
taking your measurements.

Width (cm):

Measure the pole not the window itself. Measure the
width between the decorative finials.

Length (cm):

Please measure from the bottom loop of the curtain
ring to the required length. We will add 3cm above
the loop to your measurement.

For sill length measure to your desired length below
the sill. For full length measure to the floor or longer
if desired.

How To Measure For Cafe Rods

Outside a window recess:

Width (cm):

Measure the distance between your brackets on the wall. This will be the length of your rod.

Length (cm):

When using a pole, measure from the bottom loop of the curtain ring to the required length. When using a batten, measure from the top edge of the batten to the required length.

Use the narrowest point as your width

Inside a window recess:

Width (cm):

Record the width measurement and **subtract 1cm to account for the thickness of the brackets**. This is the length of your rod.

Length (cm):

Measure the length from the top to the bottom of the recess.

Additional information

I confirm that all measurements and details are correct
